

Hanamariam Yehuala

3rd year software
engineering student in Addis
Ababa University(AAiT).

My experiences and skills

- web development: developed a website for local business using HTML,CSS and Javascript.
- Software Engineering: programming using python and java.
- I did different projects individually or in team most of them are found in my git account for example we did the hotel system, full website for tutorial(contain front end and back end), and also different frontend website in different format.
